ANOTHER BIG BREAK-MARKETS SUCCUMB SHARPLY.

SELLING PRESSURE WAS ON AGAIN IN WHEAT.

Corn and Oats Weakened in Sympathy With Wheat and Other Influences, Closing Lower.

Office Republic, Thursday, June 28, 1996. It was made plainly evident that there was no real strength in the speculative grain situation this morning, and that the bulge of yesterday, believed by many to be the end of the bearish spell was no more than a flash in the pan. The weakness exhibited to-day was even more pronounced than it has been on any day this week, and there was no hanging back of the markets when they once got started down hill, their course being almost wholly uninterrupted toward a lower level. Of course there were the usual rallies and reactions, but they were never of sufficient significance to materially check the downward drift of prices, but seemed to accentuate the weakness of the general situation. Liquidation, which was supposed to have about ceased, was resumed to-day with vigor, and was one of the principal influences in shaping the course of the bearish advices, but the former was not given the consideration of the latter, and the result was that a general tumble in

bull movement in this grain and on which the above price for this cereal was freely predicted and believed in by many, appears to have culminated last Monday, when the price was within hailing distance of 50c. Since then there have been no reactions of great significance. Yesterday there was a feeble kind of strength shown, and since some slight recoveries in prices, but it would seem, from to-day's actions, that it was only the last dying struggles of the bull market. The old school days' saying, "What goes up must come down," has been proven in the case of wheat during the present month. Last Saturday the two chief specular to the same of the same of wheat during the present in thus case of wheat during the present in thus saturday the two chief specular to the same of the in the case of wheat during the present month. Last Saturday the two chief specu-lative options touched the top on the boom, and unless things change for the better it looks very much as if the coming Saturday would witness the bottom. Selling started in afresh this morning and

the opening hour witnessed a bad break in prices. All the domestic markets were in the same boat, being weak, bearishly inprices. All the domestic markets were in the same boat, being weak, bearishly inclined and sharply lower. The initial news favored selling. In the first place, foreign markets, according to information received, still refused to take cognizance of the build movement on this side, and again presented a very chilly front to our strength of yearerday, the first cables reporting a decline of \$4d at Liverpool, \$4d at London and \$2d at Liverpool, \$4d at London and \$2d at Liverpool and quiet, but not pressed for sale, at London. The Cincinnati Price Current issued a bearish report, estimating the lotal crop at \$20,000,000 bu, which, with reserves, would give sufficient wheat to satisfy all domestic and foreign requirements, and it also stated that the total world's crop would be 5 per cent greater than for five years. There were reports of light rains in the Northwest, but the conditions prevailing in the Southeast were said to be extremely critical, owing to continued rains. On the other hand, the general ran of news from the Northwest was builish as ever, as was also that from the harvesting sections. Receipts at primary markets were largely smaller than those of a year ago, and Galveston and New Orleans reported the clearing of 185,000 bu, nearly all of which was said to be new wheat.

As previously stated, the selling was free at the outset, and the first trades in July were at \$6 decline, at \$25d, and \$6 off, at \$35d, for September, the latter then being offered down to \$35d, with not a trade, however, below \$35d. Or September, the latter then being offered down to \$35d, with not a trade, however, below \$35d. Or September, again showed its inherent weakness, a decline on selling at Chicago breaking prices here sharply, there being no buying support. With the single exception of Paris, which closed \$35d, bower, the cables were discouragingly unfavorable. Liverpool closing 19d lower.

higher, the cables were discouragingly unfaverable, Liverpool closing 14sd lower.
Antwerp and Berlin unchanged, and BudaPesth 5c off. On the break that occurred
July sold at 85%c and Sept. at 82c. Prices
then reacted to 81%c for July, and 82%c
bid for Sept. Reported rains in North
Dakota and an almost total-rack of buying
support gave added strength to the already
bearish situation, and prices again headed
down stream, on which July struck the
bottom for the day, and sold at 79c, which
was a decline from the top of 37%c, and at
the close there were sellers 3c lower for
the day, at 75%c. Sept. sold off at 85%c, and
closed 31%c off, at 85%c asked. During the
day Aug, sold at 87%c, and closed at 2%c
lower, at 85%c buyers.

The local situation is corn was in quite
marked contrast to that of yesterday, the The local situation in corn was in quite marked contrast to that of yesterday, the conditions in a number of cases being rad-ically changed. First and foremost the bot weather had moderated considerably, and later it was claimed that rains had fallen

Trade Gossip.

Chicago reported cash sales yesterlay of 1.200,000 bu. corn and 256,000 bu. ats. At the seaboard exporters took 220,000,000 bu. wheat, 220,000
bu. corn and 256,000 cash.

The Chacinnail Frice Current says: All
ipring wheat not over 250,000,000 bu. and preshibly
some less. Whiter wheat indicates 260,000,000
bit. Reserves now equal year and Tribin, with
steemt crep, will furnish quantity equal
year's consumption and exports. The worldde
wheat crop practically equal to hast ear and a
per cent over past five years' average.

—A telegram from Charleston, in Southeast
Hesouria, read. "Two inches rain this morning.
Farmers dissouraged."

—An official of the Great Northern Rullway
states that wheat conditions were far more
favorable than the newspape's moleculed. He
blaces the damage in the Red River Valley at
not over 20 per cent. The St. Paul Railroad
Company reports the crops along the Hastings
and Dakota division in a poor condition. It says
that unless heavy rains come the damage will
be much greater than reported.

—Cable advices from Kieff, Ruissis, say that in
the northern Governments of that district winter wheat sowings suffered great damage from
heavy rains, while in Podolla, Kieff and Volyria
the crops are in danger from drought.

—Winnipeg had rainfall of Lies neches yesterday and showers were general throughout the
province. A Winnipeg special says of was the
first heavy rain since last fall. Wheat crop is
and allowers were general throughout the
province. A Winnipeg special says of was the
first heavy rain since last fall. Wheat crop is
and allowers were general throughout the
recovince. A Winnipeg special says of was the
first heavy rain since last fall. Wheat crop is
and allowers were general throughout the
recovince. A Winnipeg special says of was the
first heavy rain since last fall. Wheat crop is
and allowers were general throughout the
recovince, A winnipeg had the first neches year.

Good reports, however, one from Edmonton,
calgary, Raitle Food and other lecasities to th. prospects for a flax crop here and elsewhere."

—Secretary Friedlander of the San Francisco
Produce Exchange estimates the California
wheat crop at 25,200,000 bu. The Government's
restimate hast year was 25,200,000 bu. and the
June I promise this year is 25,200,000 bu. and the
June I promise this year is 25,200,000 bu.

—Snow says: "The Frice Current's statement
this morning that the world's wheat crop is
equal to last year's does not agree with the hest
authorities. On June 12 Broomhall of Liverpool
Corn Trade News, figuring on basis of 156,000,000
but, for United States, estimated the world's deficiency at from 80,000,000 to 120,000,000 bu. as
compared with 189. Since that date if is curtain that the crop has been further reduced. The
United States are short of last year, by the most
connervative estimate, by 50,00,000. Manticon by
19,00,000, while France, the United Kingdom India and Germany are reported short and the
news from Russia is not hopeful."

—Minneapolis wired that experts figure the

different markets. There were buildsh and Putents. HAVE FLOUR-Jobbing at \$3.30 in sks. and \$3.30 given the consideration of the latter, and the result was that a general tumble in prices took place, which in the case of the higher priced grain was a serious one.

One dollar wheat, for the present at least, seems to have disappeared from view, and no longer is it talked about on 'change. The bull movement in this grain and on which the above price for this cereal was freely the above price for this cereal was freely the serious the result and steady. Prices on training movement in this grain and on which the above price for this cereal was freely the serious control of the median graines, but choice chiefly sought after any very scarce. The test cover was wanted. Printe quiet and steady. Prices on training the serious coverage of the median state.

Shipments of Flour.

Skipments of Flour.

Skipments

St. Louis, Thursday, June 28, 1800. The produce markets were generally quiet today and prives were weak or jower. Receipts of products were heavy and the demand slow. Shippore were only moderate buyers, and the local trade was easily satisfied. Potatocs were weak and lower, as receipts were again heavy and supplies have begun to accumulate. Wagon receipts were ample to supply the demand, and Southern shipments were slow of sale. Offerings were generally of fine quality. weather and moderated considerably, and later it was claimed that rains had failed in several sections of the corn raising States, thus refleving apprehensions of damage to the crop. Liverpool was reported its lower early, but that murket reacted and closed at, in a grant of the day. Receipts at primary Western markets were 620,000 bu, as against 1,05,000 bu, and the exports from ports were 620,000 bu, and the exports from ports were 620,000 bu. The opening was easy and Sept. Sold is clower at 13 is, but on the strong raily in wheat the market was hid up to 135,27 bc, but only to again weaken and fail lack. The only trading in July at this time was at 12c. The great weak ness and sudden collapse in wheat prices, together with the reported rains, imparted more weakness to corn late in the session and Sept, at one time was offered a 43 in the session and Sept, at one time was offered a 43 in the session and Sept, at one time was offered a 43 in the session and Sept, at one time was offered a 43 in the session and Sept, at one time was offered a 43 in the session and Sept, at one time was offered a 43 in the session and Sept, at one time was offered a 43 in the session and Sept, at one time was offered a 43 in the session and Sept, at one time was offered a 43 in the session and Sept, at one time was offered a 43 in the session and Sept, at one time was offered a 43 in the session and Sept, at one time was offered a 43 in the session and Sept, at one time was offered a 45 in the session and Sept, at one time was offered a 45 in the session and Sept, at one time was offered a 45 in the session and Sept, at one time and the decline in the session and seed the second se

scoop bu. The opening was easy and Sept. sold Mc lower at 43½c, but on the strong rally in wheat the market was hid up to \$2.500 bu, only to again weaken and fall lines was at 42c. The great weakenses at ocollapse in wheat prices, logether with the reported rains, imparted more weakness to corn late in the session and Sept. at one time was offered a 43½c/bd. July at the close had sellers at Mc decline to 13½c sellers, and June was nominally it lower at 42c.

The speculative situation in cats exhibited quite an undertone of firmness at the mitset, and Sept. sold 1-16c better at 24½c, while 25½c was bid for July. But like every hing else, this grain weakened later and sept. finally sold at 2½c and was then of-cred at 23½c/bc, which was ½c off for the local trade was light and there were milly sold at 2½c and was then of-cred at 23½c/bc, which was ½c off for the course of th

eccipts at St. Louis to-day were 4.218 cases,

WEEK'S TRADE IN IRON.

Conditions Are Growing Worse Instead of Better.

Stead of Better.

New York, June 28.—According to the Iron Age, in its weekly review of the Iron and steel situation, it is idle to attempt to diguine the fact that the situation in the Iron trade has been growing worse instead of better. That paper, after thus declaring its views, says:

"The reductions in price which have thus fur been made have not served their purpose in bringing the great body of consumers into the market. They continue to withhold their orders, and it will probably take some definite development of a favorable character to induce the piacing of any considerable business. Instead of favorable developments, we have had for some time a succession of unfavorable influences. Among these the desught in the Northwest is just now exerting a perticularly depressing effect. If conditions in that section were as they should be at this season, impierment manufacturers would undoubtedly have placed orders to cover the material they need in making up implements for next year, while other important consumers having considerable outlets in that direction would have been good buyers of from and steel makers was held in this city on Tuesday, and while the nominal Pittsburg prices of £0 for Bessetter from and at a Hessemer billets were soft changed, it is understood that the market is now, an open one and that pig from and steel are both being offered at much lower prices. The plant the market, but is burting it. It is realized that prices on pig from, steel and inheling the market, but is burting it. It is realized that prices on pig from, steel and inheling the market, but is hurting it. It is realized that prices on pig from, steel and inhelping the market, but is hurting it. It is realized that prices on pig from, steel and inhelping the market, but is hurting it. It is realized that prices on pig from, steel and inhelping the market, but is hurting it. It is realized that prices of making foundry from, that he per bloom out to the past two market being the pince of labor troubles and foundry from the f

California Dried Fruits.

The barley market ruled firm under light receipts and a good demand. Only two cars were offered on the market to-day. Late yesterday afternoon 5.00 bu, of choice maiting sold at 50c. Samples ranged from 35c to 55c. Clearances from New York were to 55c. to 15c. bu Becomis were 6 cars. neavy-147,642 bu. Receipts were 6 cars.

Timothy and Clover Seeds.

Sept. timothy seed closed weak and 715c lower. This future opened at 12.19 and sold off to \$5.075e, at the close. For Oct. 32 was bid and \$5.075e, at the close. For Oct. 32 was bid and \$5.05 asked. Clover held steady, with contract quoted at \$8 and Oct. at \$9.

Provisions.

Provisions.

Provisions were quite weak, even with \$.095 fewer held in the local receipts than were estimated yesterday and 7.400 less at the chief Western packing places than received the corresponding day of 1899. The Clusionati Price Current reported the week's picking in the West at 455,000 head, as against 45,000 the corresponding week of the year before.

A drive was made at the market's most vulnerable point—pork—and the other spec-A drive was made at the market's most vulnerable point-pork-and the other speculative commodities tumbled in company when the point of atta-ik was successfully carried. Many stop-loss orders were reached, and for a few minutes in the forence all were sellers in the provision pit, with no one to take the offerings. Some recovery left the market with the feeling less strong in Sept. sellvery. Pork lost 23/2c, lard and ribs. each, 12/2c, Liverpool quoted short clear backs 6d up, and lard at a similar advance. The local run of hogs for to-morrow is estimated at 20,000 head.

Rye.

Rye was dull, weak and lower. Only one trade was made—Sept. at 61%. July and Sept. changed at a difference of 1%. No. 2. f. o. b., sold at 61%. Sept. closed with layers at 60% and sellers at 61%. Receipts were 5 cars.

Barley.

Flaxseed was dull, closing steady. Sept. opened at \$1.50, declined to \$1.47, then reacted to \$1.494, Oct. opened at \$1.40, rose to \$1.40, then went down to \$1.38, reacted and closed at \$1.40.

TRIED TO TAKE A TOWN.

Three Negroes Wounded in a Fight With Officers.

REPUBLIC SPECIAL. REPUBLIC SPECIAL.

Metropolis, Ill., June 28.—Late last night a crowd of fifty negro toughs came here from Paducah, Ky., on a steamboat excursion and attempted to take the towin. They were armed with revolvers, and were drinking heavily. At the water's eige a general fight between the toughs and the Metropolis police force ensued, in which over 160 shots were exchanged. As a result three of the officers escaped uninjured. Several previous attempts of this character have been made by this same crowd of rufflans, but none was quite so serious in its result.

Superintendent McArthur Transferred REPUBLIC SPECIAL.

South McAlester, I. T., June 28.—E. T. MoArthur, Superintendent of Schools for the
Choctaw Nation, has been transferred by
the Interior Department to a similar position in the Seminole Nation, He will also
have the management of the national
schools at Pawhuski.

Industrial Republican League,

REPUBLIC SPECIAL.

Springfield, Ill., June 28.—A meeting of the Illimois Industrial Republican League was held here to-day. The gathering was addressed by Governor Tanner and other State officers. P. H. Donnelly presided at the meeting.
